Reduces the need for multiple products whilst retaining exceptional results

LEMGRIT is a biodegradable hand cleaner that dissolve grease, oils, tars, paint, printers' ink, and the majority of soils encountered. A scrubbing abrasive gently removes ingrained dirt by massaging the skin.

DIRECTIONS FOR USE:

Place a small quantity of LEMGRIT into the palm of the hand. Do not wet hands with water first, as this reduces efficiency. Rub hands together so that the gel liquefies and spreads evenly. Massage well into soiled areas. Rinse with plenty of water. Alternatively, if water is not available, simply wipe from the skin using a cloth or paper towel.
