GR 500 - MULTIPURPOSE DEGREASER

CREATED BY

BUSHBY CLEANING Greener Science

MULTIPURPOSE

All purpose degreaser- Food Grade

A Degreaser for all situations!

GR 500 is the latest example of a Bushby constructed cleaner that is food grade in compliance and safety, but is also very at home in a mechanics work shop.

When tested in commercial kitchens, large fish shops, butcher shops and bakeries, we found exceptional results on oily splashbacks, floors and walls. What was very exciting is when we applied the same product to industrial and mechanic workshops!

Greasy oily floors and benches were easily cleaned in a fast inexpensive manner. Oh, and as a shower cleaner it is pretty exceptional as well!

How does it work?

Degreasers come in many forms. A lot of them are very harsh and have needed to be to be able to penetrate, dissolve or break down many different types of soiling from food place fats and oils through to mechanic workshops comprising of petrochemical, grease and oils.

Old school technology was often based on Kerosene based cleaners which offered very little - if any dilution, smelt bad and was very flammable.

GR 500 (Grease Release 500) is made up of many different ingredients to help break down all manner of greasy oily deposits, but remains much safer, very dilutable, user friendly, cost effective and able to be used in all types of businesses and households.

GR 500 - The latest Bushby product for fast acting, Non Toxic, Biodegradable de-greasing for all of your industrial, Commercial and Household needs!

This photo demonstrates the degreaser and its foaming properties as shown in the foreground.

The foam was created using a special trigger on the spray bottle.

Foam allows for the product to have 'Hang Time' on a surface. This helps the cleaning process as the cleaner is able to penetrate vertical surfaces for longer.

Key features

- Non-toxic
- Biodegradable
- Non Flammable
- septic safe - septic bacteria enhancer
- multipurpose - multi surface cleaner
- concentrated product
- grey water safe - safe for gardens
- great on all surfaces in areas such as kitchens, bathrooms, toilets, showers, bins, building chutes, wall cleaning, vehicle cleaning and a lot more...
- can be sprayed, mopped, poured or foamed
- great dilution rates
- For use in Industrial facilities, Commercial Kitchens, Schools and Households.

DIRECTIONS FOR USE

GR 500 is a strong, but safe cleaner. Dilution rates may need to be varied depending on the level of soil deposits that require removing.

Spray and Wipe

For a general spray and wipe, dilute GR 500 at a rate of 1 part product to 40 parts water.
(13mL in 1 Litre of water).

For more stubborn cleaning: 1 Part GR 500 to 10 Parts water.
(100mls GR500 in 900mls of water).

Floor Cleaning

Can be as low as 50mL in 5 Litres of water. Scrub with a stiff broom and wash off.

High Pressure Sprayers

1 Part GR 500 in 60 to 80 parts water depending on soiling.

Soaking

For soaking of parts, utensils and filters, dilute at 1 part GR 500 to 20 Parts water.
500mL in 10 Litres of water

NOTE*

For best results, allow GR 500 to penetrate the soiled area to be cleaned for a few minutes before rinsing. Always rinse after use.

GR 500 is a Non DG, Non Toxic,
Biodegradable, Septic safe and now a best
seller product from BUSHBY CLEANING
