

MOULD & ALGAE TREATMENT - D-MOULD

CREATED BY

BUSHBY CLEANING Greener Science

READY TO USE MOULD CLEANER & INHIBITOR

fast acting, deeper penetration, long lasting results -
indoor and outdoor cleaner

what is special about D-MOULD compared to other mould cleaners?

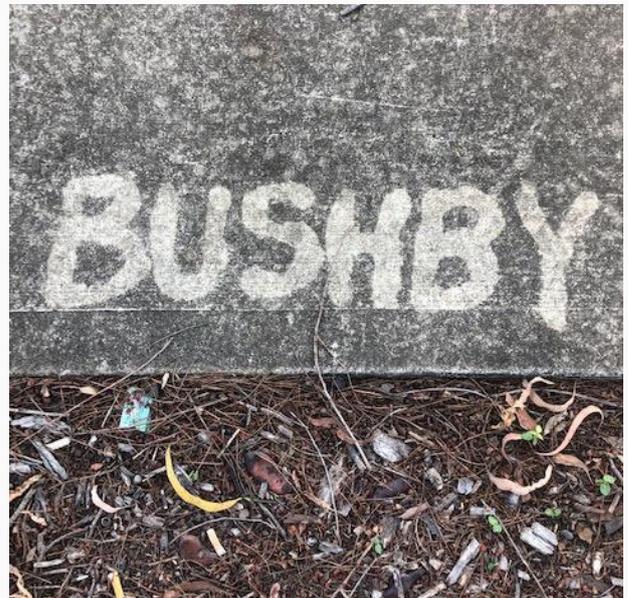

- D-MOULD is a 'ready to use' mould and algae cleaner.
- D-MOULD is able to be used indoors as well as outdoors on a large range of surfaces.
- D-MOULD is very fast acting and is not listed as a Dangerous Good.
- D-MOULD is proven to keep mould off external areas such as retainer walls, driveways, buildings, tennis courts, fake grass, shade sales and more for up to and beyond 2 years, in many cases considerably longer!
- great for shower treatments as well as indoor surfaces.

How does it work?

D-MOULD is a specialised formula that uses the power of sodium hypochlorite or bleach as a broad spectrum mould killer and inhibitor. However, bleach by its-self is only a very short term treatment.

We have been able to create a treatment that enhances, penetrates and kills the Mould spores deep in the porous of surfaces where the spores were protected, until now. Our unique formula allows mould removing unlike any product before.

This photo was taken 14.01.2020

15 months ago D-MOULD was sprayed / foamed onto a mouldy concrete area outdoors under a shade sail. No brooming or aggitation was applied.

Be Safe, Don't Stay in a Home Infested With Mould or Mildew. Mould can cause serious health problems, as well as structural damage.

Key features

- Fast acting
- when used externally, it can keep mould off for up to 2 years and longer
- For indoor and outdoor use
- Can be applied to many different surfaces and materials
- Does not have to be used on a regular basis
- Provides a healthy environment, reduces health risks
- Property protection
- Easy to use
- Can penetrate areas other mould cleaners cannot access (such as silicons)
- D-MOULD is not classified as a dangerous good.

Moulds can cause nasal stuffiness, throat irritation, coughing or wheezing, eye irritation, or, in some cases, skin irritation. People with mould allergies may have more severe reactions.

DIRECTIONS FOR USE

D-MOULD is a 'Ready to Use' Product. Do not dilute or add water.

Do not mix with other chemicals especially with acids. Refer to SDS for more safety information.

Spray and Wipe

Decant product into a spray bottle. Spray or foam (Spray and Foaming triggers are available from Bushby's) onto the surface such as shower grout. Leave on surface for 5 minutes. For extreme cases it may require a brush over and a repeat of spray. Wash off with potable water and allow to dry

Concretes, floor, driveway, stone work, large area cleaning, Tennis courts, Synthetic grass, shade sails and more..

D-MOULD can be applied using a garden sprayer or pressurised spray pack. Sweep or clean all dirt and debris from area to be treated. Spay D-MOULD over the area to be cleaned of algae and mould. Use broom to push product around and help it sink into infested areas. Hose off the area when satisfied an effect has taken place.

Thick infested areas may require a second treatment.
